

Criando uma Class no uWebModule

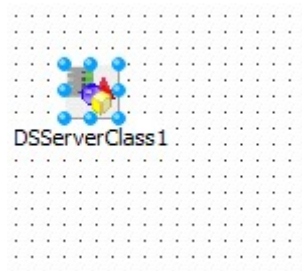

Selecione o uWebModule.pas.

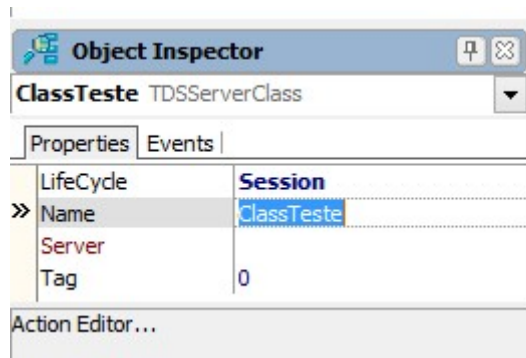

No campo "Search" Digite "TDServerClass" e pressione ENTER.

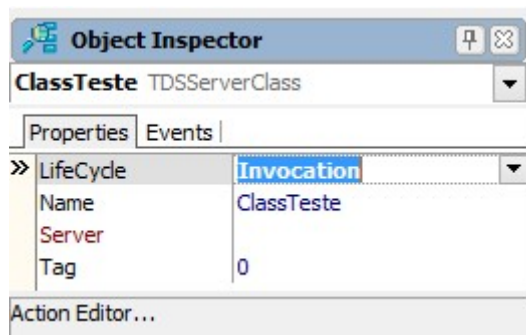

Selecione a Class nova.

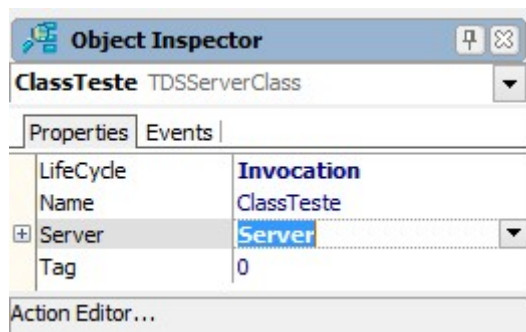

No campo "Name" informe o nome da Class.

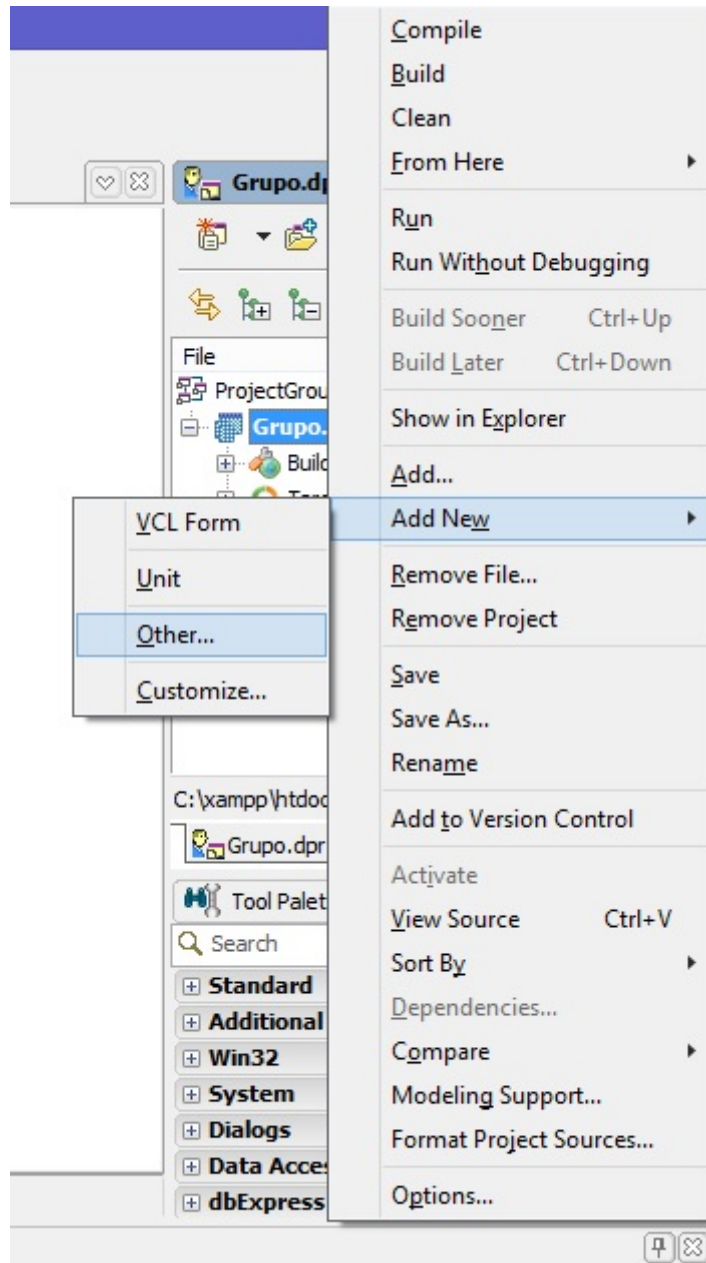

No campo "LifeCycle" mude para "Invocation".

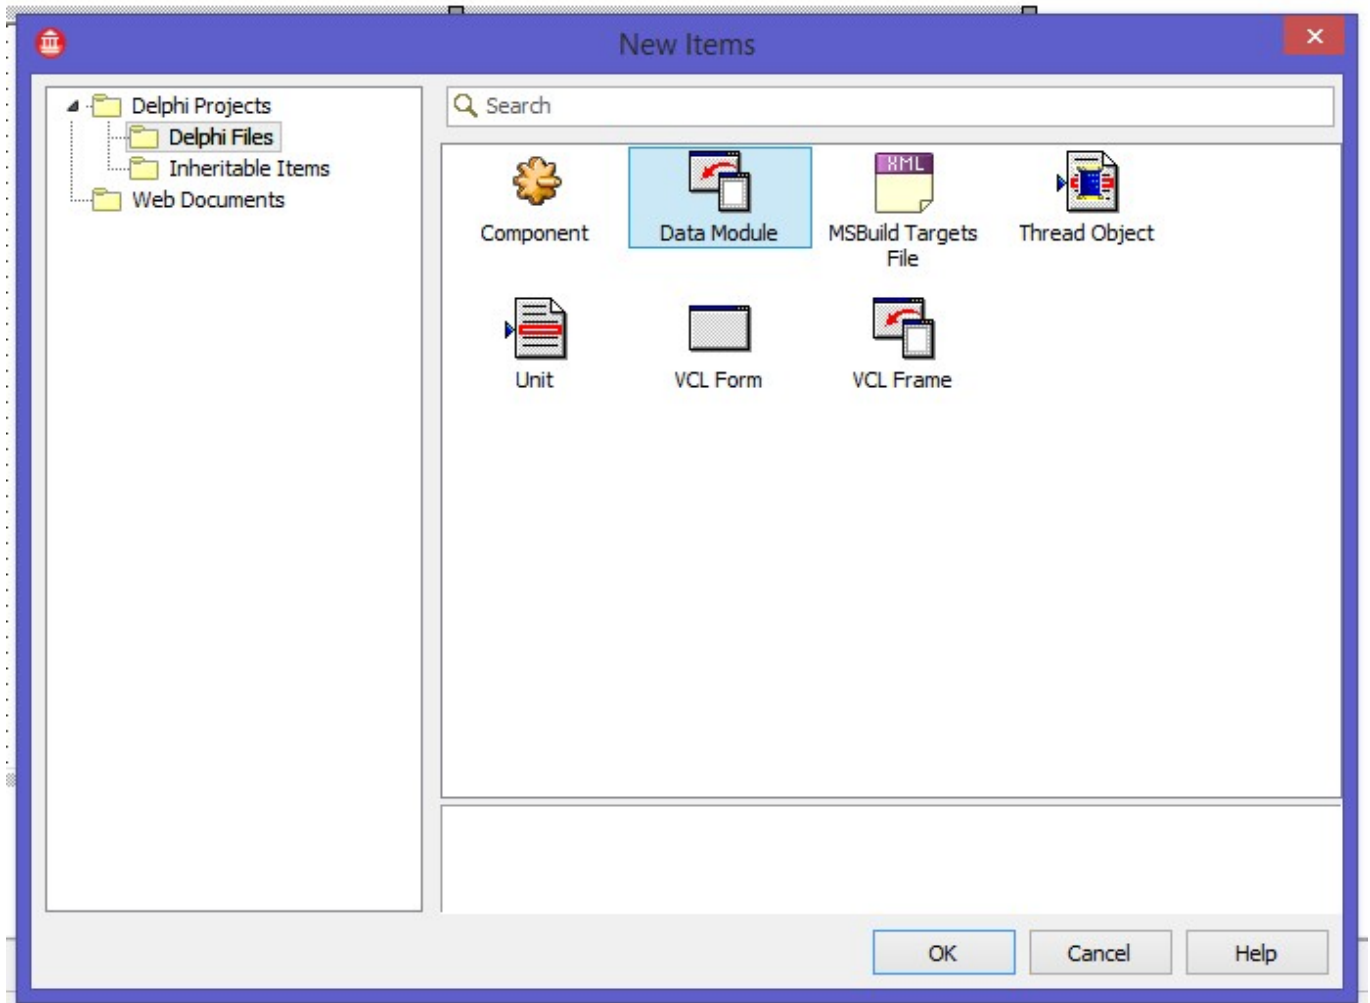

No campo "Server" mude para "Server".

Clique com o botão direito do mouse no executável do projeto, depois click em "Add New" e depois em "Other".

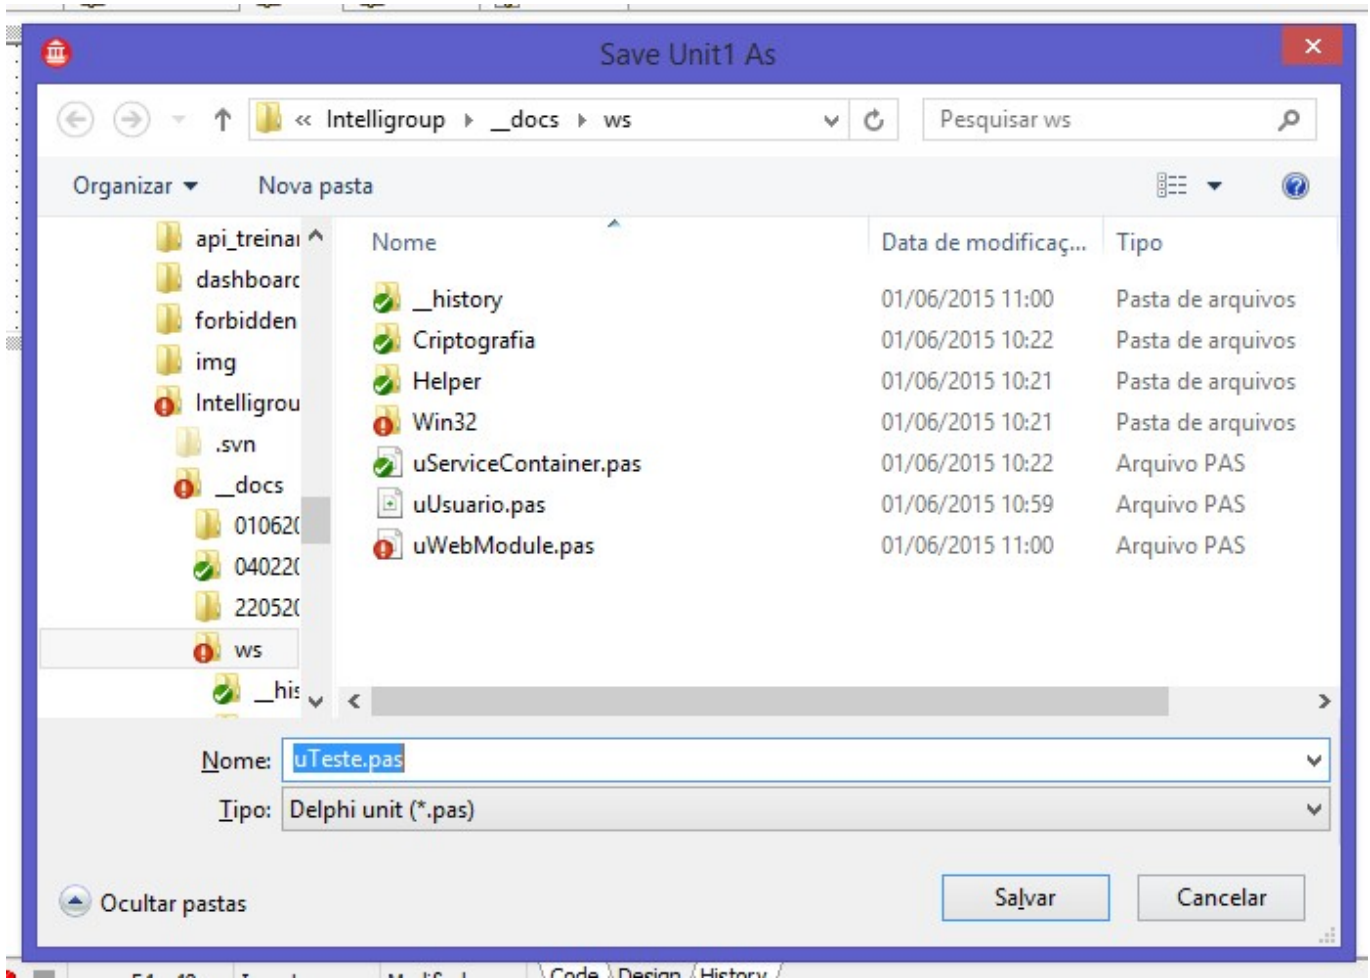

Selecione "Data Module" e depois click em "OK".

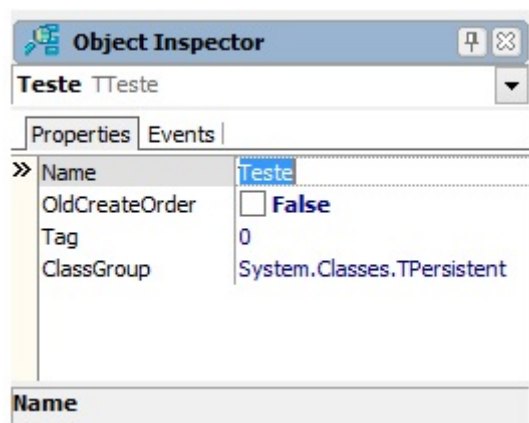

Aperte "ctrl+s" ou vá no menu "File" e click em "save".

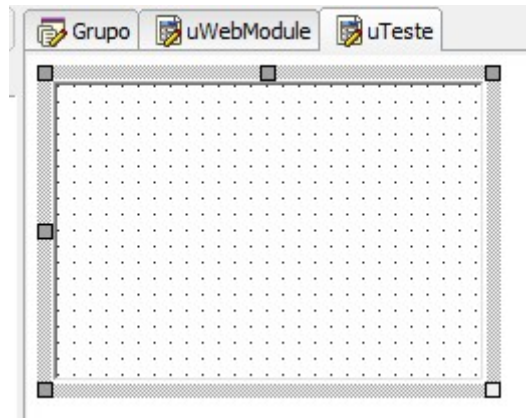

informe o nome do arquivo. Como padrão o nome tem que ter a primeira letra sendo "u" e depois seguido pelo nome da class. Por exemplo: com a "classTeste" o nome ficaria uTeste.pas. Depois click no botão "Salvar".

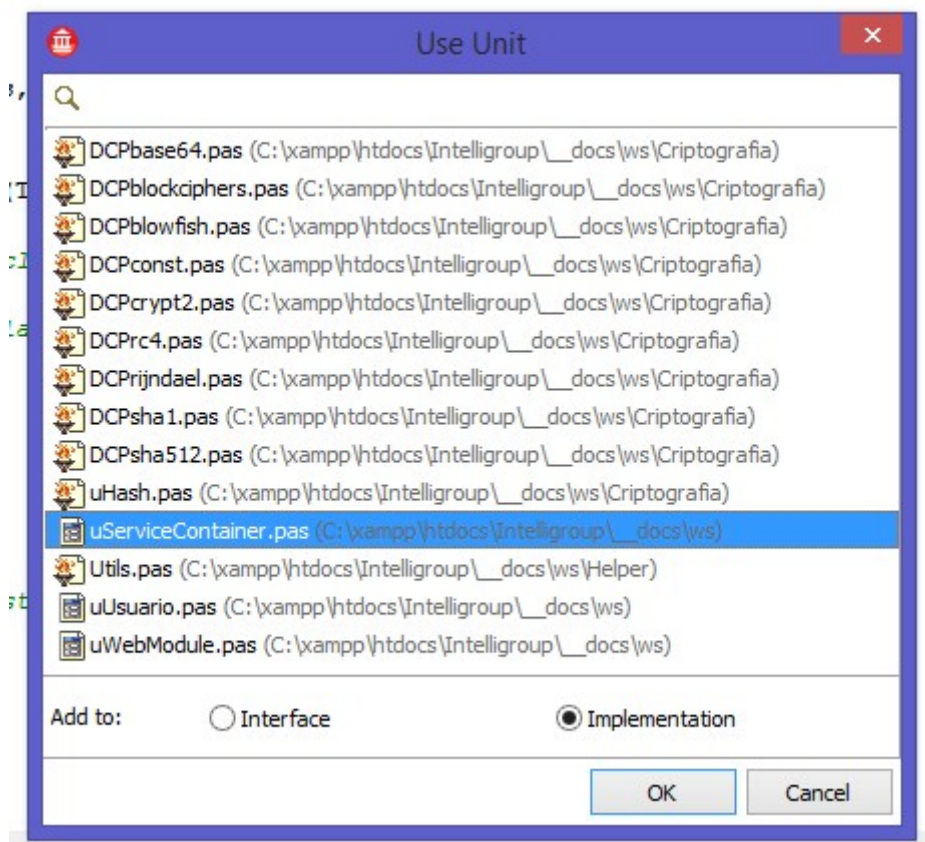

No campo "Name" altere o nome.

Nesta tela aperte "F12" para ir ao código fonte.

Aperte “Alt+F11” e selecione o “uServiceContainer” e depois click em “OK”.
